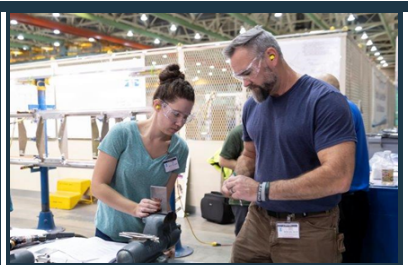
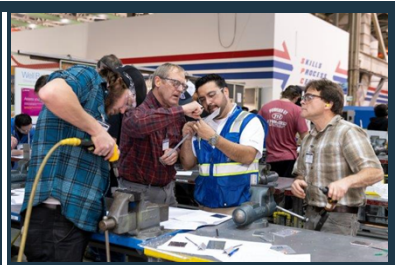
Aerospace & Advanced Manufacturing





March 11-12, 2020

WITEA Pre-Conference Professional Development

In collaboration with:

BOEING

Washington Office of Superintendent of PUBLIC INSTRUCTION

AJAC Aerospace Joint Apprenticeship Committee

CENTER OF EXCELLENCE AEROSPACE & ADVANCED MANUFACTURING

WHAT TO EXPECT

- Skill development for instant classroom use
- Industry professionals focused on teaching relevant skills
- Continued connection and collaboration with state industry and academic partners

DETAILS

- For current, new, or potentially new manufacturing teachers
- Class offerings are aligned to Core Plus and AJAC requirements
- Cost for attending is free, but your travel cost are on you.

Here is the link for the registration page: https://core-plus-training-2020.eventbrite.com

Classes offered:

- **Precision Measurement** – From decimals to dimensions, gages to micrometers, learn how industry utilizes tools and processes.
  Delivered by Boeing instructor
- **Machining** – Get some hands on instruction in Mill & Lathe basics and receive two projects to take to your classroom.
  Delivered by AJAC
- **Lean** – Learn how to minimize waste and increasing efficiency. Learn how industry utilizes Lean & 6 Sigma in their day-to-day operations. Projects & ideas to incorporate into your classroom and increase structure and shop habits.
  Delivered by AJAC
- **Mechatronics/Electrical** – Learn more about foundational electrical skills and how it cross over into Mechatronics/ Automation Tech.
  (This class will be a joined class with CTC instructors and offered by the COE)
