

CORE PLUS AEROSPACE

You Have a Head Start

Through your participation in Core Plus Aerospace, you have skills and knowledge that are:

- In-demand by employers
- Highly transferable across different types of jobs and industries
- Gateways to higher-level academic programs

Most importantly, these skills provide you with options.

To Do List:

- Get your Core Plus Aerospace certificate from your instructor
- Research and apply to community/technical college programs, and prepare to enroll as early as this summer
- Apply for financial aid and research what resources are available
- Keep your resume up to date
- Build your LinkedIn profile and join the Washington Aerospace and Advanced Manufacturing Talent Network

CONGRATULATIONS CLASS OF 2022!

Through hard work and dedication, you have reached an exciting and important milestone. Take some time to reflect on and enjoy your accomplishments!

Whatever your next step may be, we are excited to see what you achieve next! We also recognize you might feel uncertain about the future. That's okay! We're here to help with a few resources.

Find the Next Step that's Best for You

It's more important than ever to keep building your skills and make your resume stand out. Community and technical colleges across Washington offer courses and training programs that build on the advanced manufacturing skills you developed in your Core Plus Aerospace coursework. Add to that, your skills are already in demand. Manufacturing companies are hiring for entry-level positions with built-in opportunities for continued training and growth.

"There are multiple education opportunities that stem from Core Plus Aerospace for students after graduation. Students can continue their education at a community and technical college to upskill and may qualify to come into Boeing at a higher pay grade. For students ready to join the workforce there is a ton of opportunity for them in entry-level positions. These students are the next generation we need here."

- **Essentia Rivera, Manager, Workforce Development, Boeing Commercial Airplanes**
