

CORE PLUS AEROSPACE

You Have a Head Start

Through your participation in Core Plus Aerospace, you have skills and knowledge that are:

- In-demand by employers
- Highly transferable across different types of jobs and industries
- Gateways to higher-level academic programs

Most importantly, these skills provide you with options.

To Do List:

- Get your Core Plus Aerospace certificate from your instructor
- Research and apply to community/technical college programs, and prepare to enroll as early as this summer
- Apply for financial aid and research what resources are available
- Keep your resume up to date and research manufacturing employers in your area

CONGRATULATIONS CLASS OF 2024!

Through hard work and dedication, you have reached an exciting and important milestone. Take some time to reflect on and enjoy your accomplishments!

Whatever your next step may be, we are excited to see what you achieve next! We also recognize you might feel uncertain about the future. That's okay! We're here to help with a few resources.

Plan your next steps

Your skills are in demand! Advanced manufacturing companies are hiring for entry-level positions with opportunities for training and growth and you can also upskill at a community and technical college (CTC).

Boeing Pre-Employment Training Program (BPET)

Core Plus Aerospace students and students in aligned, hands-on programs at high schools, skills centers, and CTCs can apply for full-time positions at Boeing through an accelerated hiring process called BPET. **Learn more at: jobs.boeing.com/bpet**

Build skills at a CTC

CTCs offer programs that build on the skills students have developed in Core Plus Aerospace, and can help individuals fast track their career and increase their earnings potential. **Learn more about WA CTC programs at: coreplusaerospace.org/resources/ctc/. Visit wsac.wa.gov to learn about financial aid and scholarships.**
